Unique selling point

Batch upload query

- Support OE query **batch upload** to elevate efficiency;
- Data upload → Fitment check → eBay fitment listing. **Everything Automated**

Accurate fitment mapping

- Using eBay vehicle table to provide accurate fitment;
- Based on TecAlliance global database to ensure **data accuracy**.

Transparent usage bill

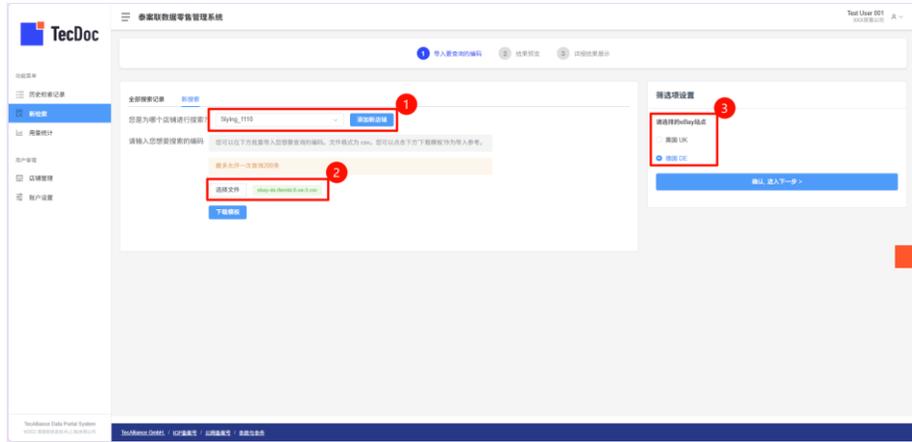

- Accurate charging with clear downloadable bill;
- **On-time usage display** for "total usage" and "remaining usage"

Security with audit log

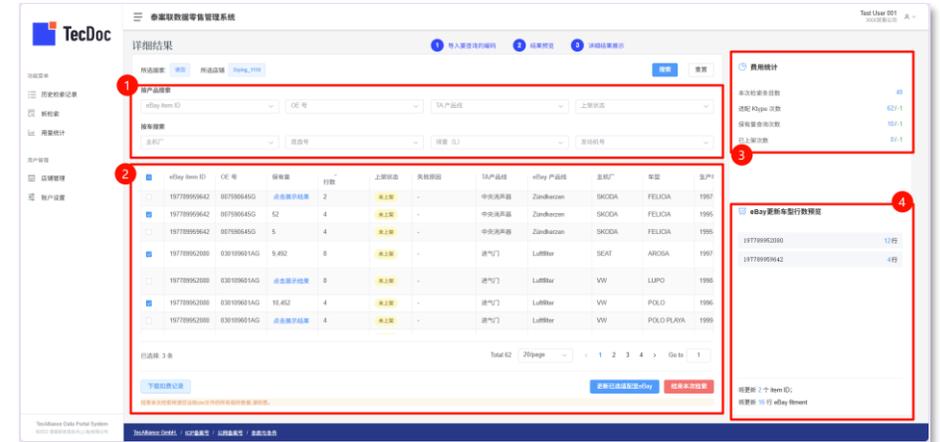

- Strict eBay shop authorization only changes fitment information. **No more extra operation;**
- Audit log to trace all operation. Enabling **multi-shop management**.

How to use it?

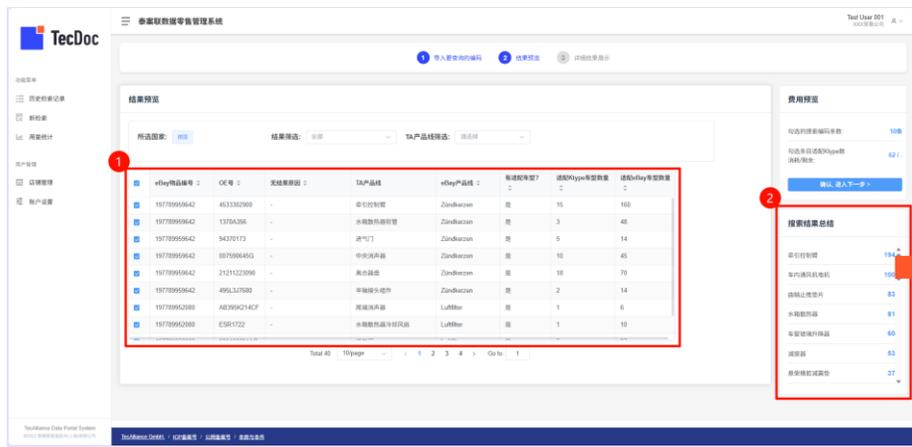

Video for reference

1. Bind / Select your eBay shop
2. Upload OE data
3. Pick eBay site

1. Can filter result by multiple dimensions.
2. Display detail vehicle info. Click to check VIO
3. Display on-time usage
4. Update fitment in eBay according to users' choice

1. Return category and fitment result number according to Item# & OE#
2. Pivot result group by category
